Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is responsive to the applicant's amendment filed on May 16, 2006.

Claims 1 and 18 have been amended. Claims 21-23 have been canceled. Thus, claims 1-20 are pending in this application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 13, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krayner in view of Gerkey et al. (Gerkey) (U.S. Patent Application Publication 2002/0117943).

Regarding claims 12, 15 and 16, as shown in Fig. 10, Krayner discloses a turntable in the shape of a Reuleaux triangle (159) and having a gerotor (100) attached thereto; the gerotor having three substantially identical lobes (106); the turntable being made from countertop material. However, Krayner fails to disclose a planar bearing surface being on the underside of the turntable.

Regarding claims 12 and 13, as shown in Fig. 2a, Gerkey teaches that it is conventional in the art to utilize the turntable (10) having a planar bearing surface (9) thereon. It would have been obvious to one having ordinary skill in the art at the time the invention was made, to have utilized the planar bearing surface, as taught by Gerkey in the Krayner apparatus, since the use thereof would have avoided friction between turntable and the cabinet base (walls) and provided for supporting and rotation of a rotatable shelf in the shape of a Reuleaux triangle.

Allowable Subject Matter

Claims 1-11 are allowed.

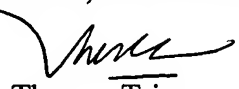

Claims 14 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
